About CREATE's 2026 Consultation with young people

CREATE Foundation has been asked by the Department of Communities to get young people's thoughts on their new Child Engagement Framework which provides an outline for engaging children and young people as active partners in research, evaluation and system design.

CREATE Foundation is leading a statewide survey and a mix of online and in-person workshops to create a safe, welcoming space where young people can share their experiences and ideas alongside others with lived experience.

No one knows what it's like to grow up in care better than the young people who've lived it. That's why CREATE is working with the WA Government to make sure children and young people have a stronger voice in decisions that affect them.

We need your support to spread the word to help engage young people in our survey and workshops. You can help by notifying young people you work with and sharing this opportunity across your email communications, social media and website.

If you would like to discuss this opportunity in greater detail, please contact wa@create.org.au
