Creating a Better System

Let's imagine the ideal system—no limits, no barriers. What would it look like if health, education, housing, and child protection worked hand-in-hand to support young people in out-of-home care? Together, we'll brainstorm bold ideas for a system where every part talks to each other, collaborates, and puts young people first. This is your chance to design the future—what does the perfect system feel like, and how do we make it real?

YAGs are for anyone with a care experience aged up to 25 years old
